

An ISO 9001 : 2008 Certified Company

"Colour Plus Polyurethanes" was initiated with a clear vision of providing Customised solutions with innovative and latest polymer technology. We are based at Hubli, Karnataka State, India, with a team of highly qualified technical professionals having two decades of experience in the polymer industry and expertise in manufacturing Epoxy and Polyurethane based products.

We are leading manufacturers with various coating applications and a highly technology driven company providing Epoxy and Polyurethane floor, wall & anticorrosive coating solutions for different conditions and applications. We have a history of technical expertise of decade in manufacturing and application field. The company started with a **strong innovative vision** and is constantly striving for new levels of excellence. This means developing innovative technologies that will open up new opportunities for the company, its employees and industry. We help our customers to choose the right product for right application depending upon the substrate. The products are used in plant utilities such as Automobile, Auto accessories, Food processing, Pharmaceutical, Electrical & Electronics, Hospitality & Healthcare, Consumer goods, Light & Heavy engineering, Process industry and many more.

We offer tailor made epoxy & Polyurethane based following systems:

- Floor coatings
- Corrosion control coatings
- Wall coatings
- Chemical resistant coatings
- Water borne coatings
- Multi-colored Granite finish coatings

Our commitment in everything we do is to achieve your trust by creating value, leveraging the power of innovative technology, products and services. Our objective is to be globally competitive by providing value added services in terms of Quality, Cost and Time. We can provide you with total solutions for meeting your business objectives with the benefits of "Colour Plus Polyurethanes" initiatives for best global practices and better business systems.

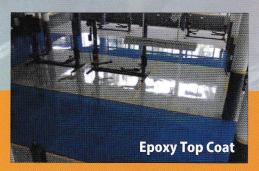

We offer

Better Asset Utilization Replacement Cost Avoidance Reduced Operating Costs Improved Product Quality

Our experience includes Manufacturing, Product Selection, Application, Floor Preparation, Project Execution, Troubleshooting, Operation and Maintenance of various epoxy & polyurethane based systems.

Epoxy based Floor Coating System

Epoxy floor coatings are very reliable systems due to their excellent gloss and strength. Epoxy resins can be adjusted according to the need for hardness and elasticity, and can be developed specifically as per the application requirements. It has a very great advantage over other floor protection systems.

PU Top Coat

Surface Cleaning

Screeding

Polyurethane based Floor Coating System

Polyurethane is a reaction product of a polyisocyanate and hydroxyl groups. We manufacture all types of urethane coatings -1K and 2 K (ASTM D16). We provide solvent borne, solventless and water borne urethane coatings based on aromatic as well as aliphatic isocyanates.

Epoxy Polyurethane based Floor Coating System (EPU)

EPU is a hybrid resin incorporating epoxy and Polyurethane resins. The hydroxyl groups in the epoxy resin are reacted with Polyisocyanate to form urethane linkages. The resulting film of EPU is flexible and quite hard and possesses excellent properties such as abrasion resistance, chemical resistance, excellent adhesion etc.

FLOORING SYSTEM DETAILS:

We provide system thickness from 0.5 mm to 10 mm and more with varied options of toppings. Some standard combinations available are: Primer + Topping

Primer + Screed + Topping

Primer + Screed + Silicon Flakes + Topping

Primer + Screed + Sealer + Topping and more...

WALL COATINGS:

We provide a range of wall coatings for both; internal and external applications. The range includes solventless, solvent borne and water borne PU coatings and acrylic coatings.

COVINGS:

We offer wall to wall, wall to floor and wall to ceiling covings with different combinations to suit your specific requirement.

PROTECTIVE COATINGS:

We cater to the anti corrosive needs of the industry with coatings that can be applied on steel structures, pipelines and several other metal and plastic substrates.

Our **Vision** is to be a globally respected coating solution provider and to achieve the same in short period by providing innovative coating systems.

Our **Mission** is to provide environment friendly industrial & decorative coating solution that would add value to customer asset.

Our **Values** are, respect for our customer, attending to their needs by consistently delivering upon our promises and commitments. We are committed to be ethical, transparent and system driven.

We seek to build long term relationships with our customers based on premium product quality, benefit to both the parties and high levels of practical support by working closely with the industry.
